INTRA-DEPARTMENTAL COMMUNICATION

DATE: November 27, 1984

FROM: Jack Hansen

PHONE:

SUBJECT: Soils testing at Kingston Ferry Terminal

TO: Al Kilian

We plan to replace the existing tie-up slip with a new auxiliary slip and transfer span. We will need soils data in order to prepare our design of the structure. We would request that you supply us with a soil report for this project. On the attached sheet we have identified the desired location of the test holes.

Would you please advise us of when you will be able to fit this work into your schedule.
